

Varsity Tutors Reviews

“I got my grades back from Logics. I got an A on the test! Thank you so much for your help during our sessions!”

5/5 stars

“Best tutor ever”

– Sohum Thakker, 5/21/2022

5/5 stars

“She is the best tutor I have had and easily the most helpful! I am absolutely egregious at math and equally as clueless, and she offered a new approach to reading logic problems which translated to my brain and allowed me to understand the concepts behind the questions presented. This approach took the form of putting each logic question into words, which helped strip logic of its abstract nature, making the question 1000xs more approachable and easy to work through. I highly HIGHLYYYYY H-I-G-H-L-Y suggest this tutor for anyone, especially those who feel exceptionally hopeless in the world of math. She not only made me feel comfortable and not judged, but she patiently walked me through the questions while teaching me tough concepts I never thought I'd understand, all due to her expertise and unique approaches tailored to each individual student. Love love love Cara, she truly helped me stay on top of my intro to logic course without any stress, she is a 10/10.”
